

Real-time Linux-based broadcast automation

OVERVIEW

Designed and engineered by broadcast professionals, QuickRoll is the next generation video scheduling and broadcast automation server. QuickRoll seamlessly integrates multi-channel scheduled playout, multi-input ingest capability, graphic overlays, video editing, file management and more into one easy to use web interface. Built on a Linux operating system, QuickRoll is reliable and secure.

FEATURES

- Zero transcoding - HD/SD compatible out of the box
- Upload & schedule a program in seconds
- Edit videos on a non-linear timeline in our web UI
- Add graphic overlays on any channel in seconds
- Output HD & SD signals out of the same box
- Schedule & record incoming video inputs in HD or SD
- Monitor your channels from the web UI
- Create text crawls in seconds, with support for RSS
- All channels share one library, with a file manager
- Play music during slideshows automatically
- Automatically fill gaps in schedules
- Reporting for inventory, channels & runlog
- Reliable and attentive support with C4

ADDITIONAL OPTIONS

- Additional HD-SDI or IP channels
- Additional HD-SDI or IP recordable inputs
- Additional storage - up to 32TB
