

SMART CONFERENCE ROOM CRESTRON & KEY CODE MEDIA BUNDLE

ALL-IN-ONE CONFERENCE ROOM SYSTEMS

No Programming Required. Make every conference room a cutting-edge presentation room. Leading-edge presentation systems securely connect a laptop to the room's display with only a single cable or a simple wireless link to the room's presentation device. Ensure that all attendees can see and hear from any seat in the room with secure, zero-latency 4K/60 streaming video and high-quality audio played through high-definition speakers. Source and display control is as simple as tapping a button on the room's touch screen. Accommodate all devices with cable management systems that enable everyone in the room to plug in or power their laptops without the mess and tangle of untidy wires.

Key Code Media designs systems and performs installations across the U.S. Our experienced and knowledgeable team help you avoid costly mistakes when installing equipment for your business. We evaluate your facilities and develop a plan to keep you ahead of current media technology trends. Let's get to work.
